1. Getting started

1.1. BSS Themes Introduction

Welcome to BSS Themes!

We are a team of amazing people including Magento experts, qualified developers, creative designers and so on. We work and learn together to bring the **best success solution** for our customers.

Our vision is **"Provide the best web design for your Ecommerce store"**

Our story

We have been developing with a journey for **6 YEARS** and beyond. Our services include:

- Magento Consultant
- Magento Customization
- Magento Optimization
- Magento Extension Development
- Magento Maintenance

We are glad to have:

1500+ *Happy Customers* with **BSS Geek**

Magento development agency who will offer you optimal solution for all problems you have.

100+ *Ways to optimization your e-commerce website* with **100+** *Magento extensions* in **Bss Commerce** with the top Magento extensions which are highly rated by the customers

Our products

High-quality themes focus on:

UX FIRST

We promise to bring the best user experience to our clients! Our themes are 100% responsive. They are also easy to use with easily accessible admin configuration that the shop owner can learn to use in just a blink of an eye

OPTIMIZED FOR E-COMMERCE

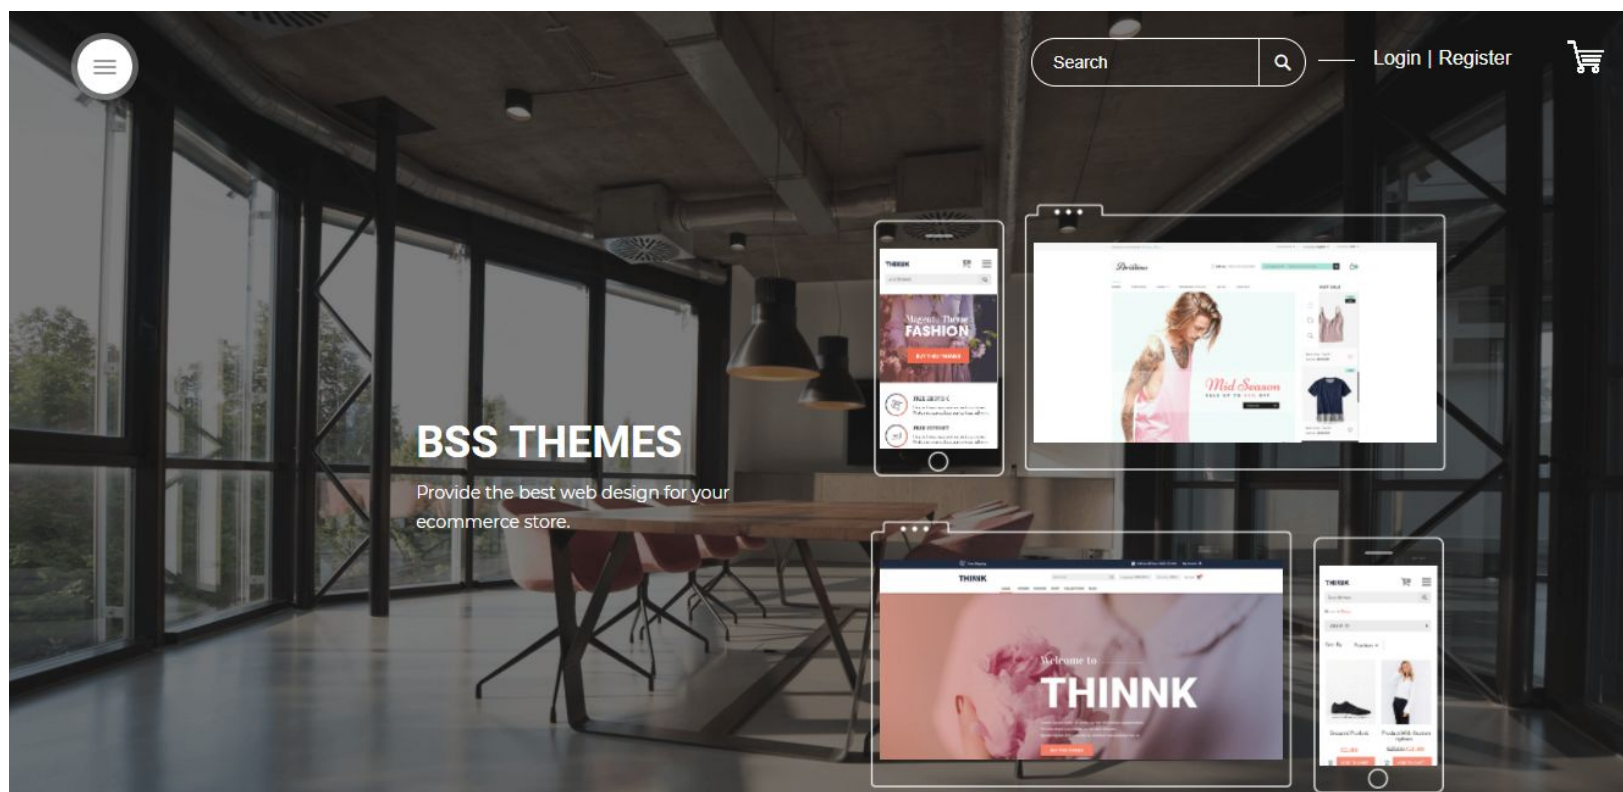

With more than 6 years experience in building e-commerce websites, we know what features are necessary. Not only optimized for website speed, our themes also give the shop owner the best space to show your incredible products, to attract the customers to click more, buy more.

UPDATE & SUPPORT

We will continuously upgrade our products, include more amazing features to improve their quality. Also, we are happy to give you any advise and customization needed for your website.

1.2. About THINNK Theme

THINNK is a qualified Magento theme which is **extremely customizable, 100% responsive and fully optimized for website speed**. It is suitable for every type of stores and make great impression with users by its flexibility and ability to customize with the nice clean code.

2. System requirement

2.1. Magento version

Our THINNK theme is compatible with Magento version 2.0.x, 2.1.x and 2.2.x

2.2. System requirement

Our theme doesn't have any requirement rather than Magento's system requirement (see more at [3.1. Magento Installation](#))

3. Installation guide

3.1. Magento Installation

- System requirements

Magento 2.0: <http://devdocs.magento.com/guides/v2.0/install-gde/system-requirements2.html>

Magento 2.1: <http://devdocs.magento.com/guides/v2.1/install-gde/system-requirements2.html>

Magento 2.2: <http://devdocs.magento.com/guides/v2.2/install-gde/system-requirements2.html>

- Magento Installation

You can see Magento Installation guide in the link below:

http://devdocs.magento.com/guides/v2.1/install-gde/prereq/zip_install.html

3.2. Theme Installation

3.2.1. Prepare Installation

Please remember to backup your website's code and database before installing our themes to make sure we have things to revert in case any conflict happens

3.2.2. Manual Installation

- Install theme via FTP:
 1. Log into your hosting space via a FTP software. ie FileZilla
 2. Unzip Package > Theme Files > theme_v2.1.x.zip (or theme_v2.2.x.zip if you use Magento version 2.2.x) and upload all directories(there are 2 directories - app, pub) to Magento 2 root directory.
- Install theme via Cpanel:
 1. Log into your CPanel(Control Panel) by your hosting account or cpanel user information.
 2. Upload Package > Theme Files > theme_v2.1.x.zip(or theme_v2.2.x.zip if you use Magento version 2.2.x) to your magento root directory and unzip its content.

3.2.3. Import Sample Data

Thinnk theme provides extremely easy - one click demo installation. In order to do demo installation, you should import static Blocks and CMS pages in BSS Theme - Settings Theme > Import Data

Magento ver. 2.1.9
[Account Activity](#) | [Report Bugs](#)

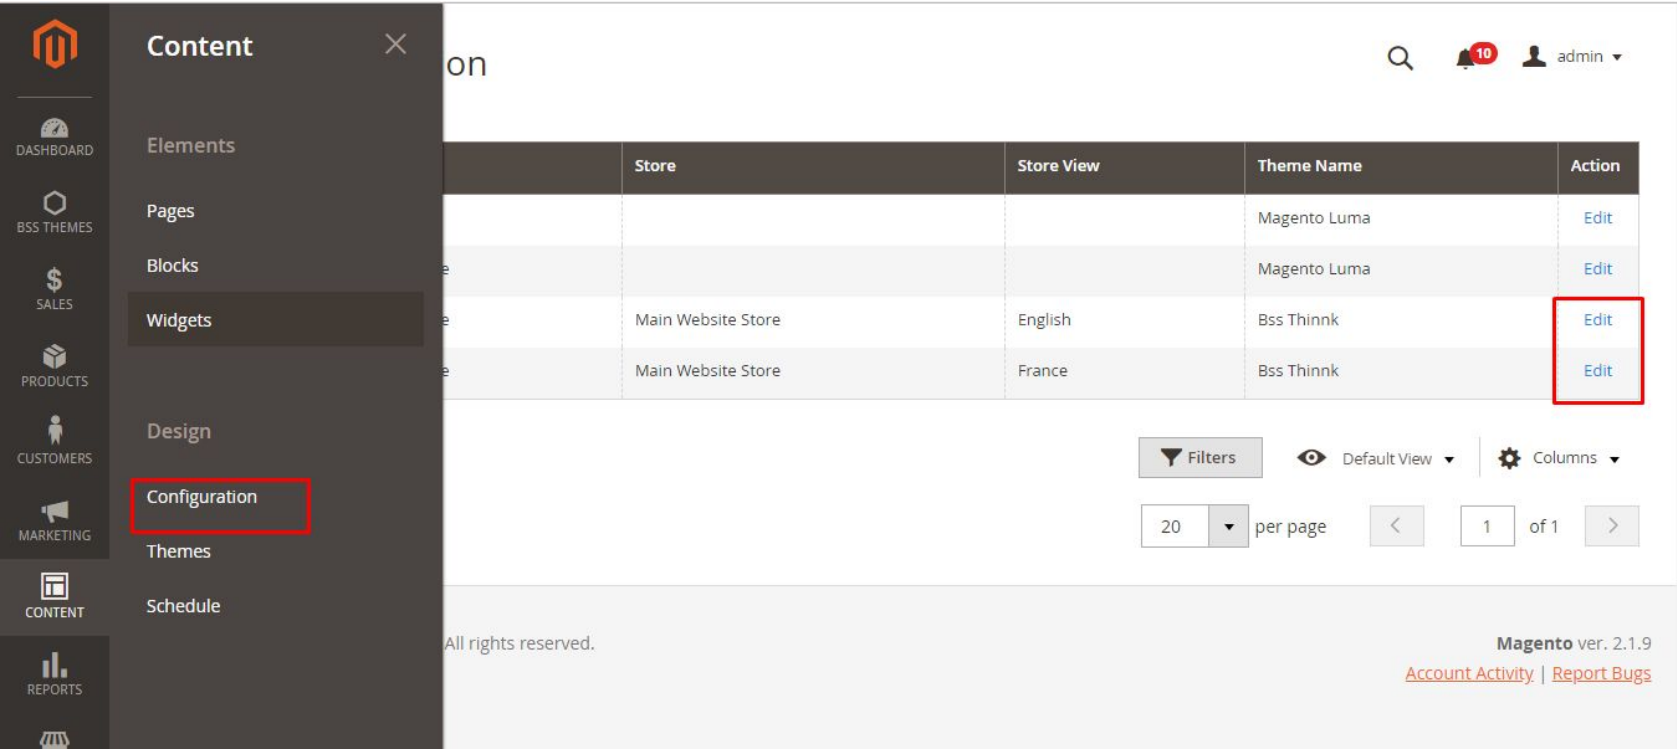

Then click on “Import” button, all sample data will be imported to your website.

4. Basic Configuration

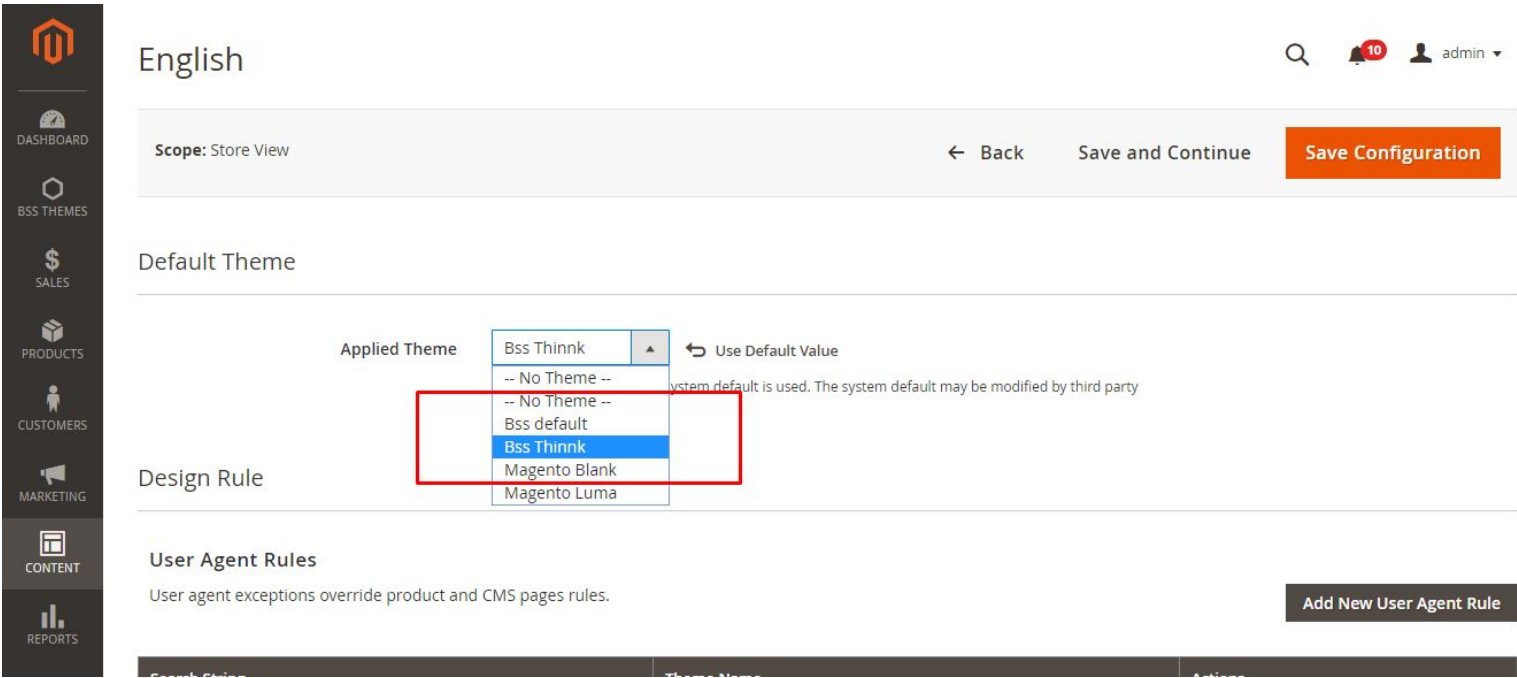

4.1. Enable theme

Thinnk Theme is equipped with the dedicated administrative module which offers a variety of additional settings. To enable it, go to **Content > Design > Configuration > BSS Thinnk** section to configure theme's main settings. Visual experience settings can also be changed in this configuration link as well.

Thinnk theme

Then, click **Edit** on the your selected theme language and choose **Bss Thinnk**

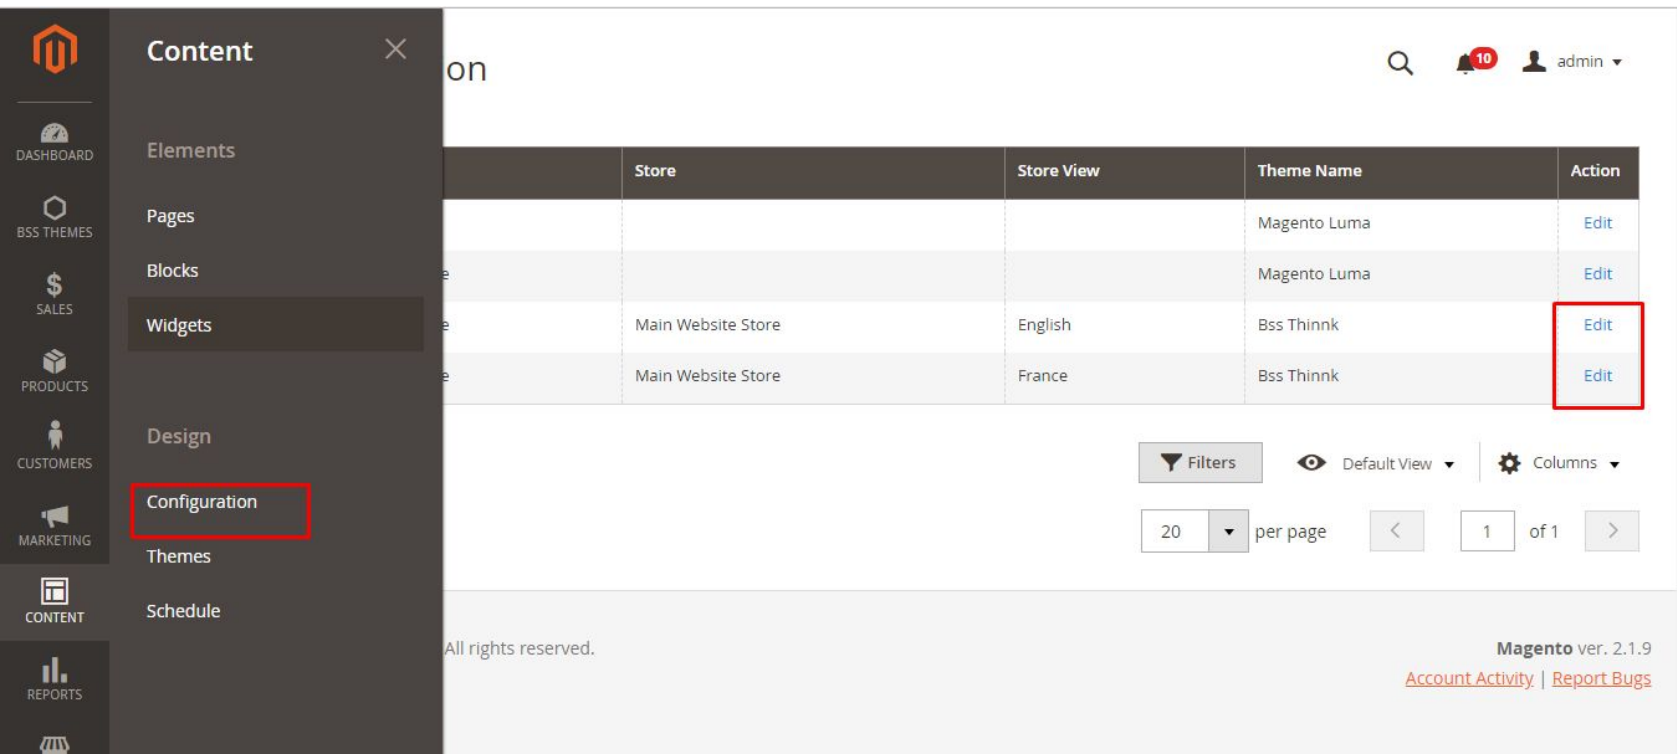

Choose **Save Configuration**.

4.2. Theme basic configuration

4.2.1. Logo

To change Logo (in Header), go to **Content > Configuration > Design > Edit Theme**, choose **Store view > Edit**

Select **Edit > Header** tab

In **Logo Image**, choose **Upload** and select logo image.

Note: Logo image's width and height should be as default.

4.2.2. Design

Configs can be changed in **Stores > Configuration > BSS Theme configs > Design theme**

- You will see the template information, you can enter your own style variables
- Once you are done with editing the values, **save the configuration**.
- After this, a css file will be generated and you can visit the frontend of your Magento store and see the new look.

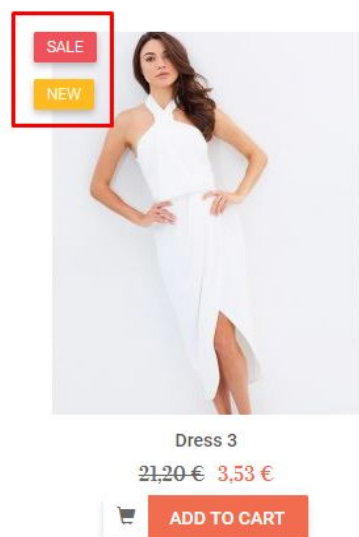

There are 2 parts in Design configuration: **Body** and **Font**

Body - Basic Color and Product Labels

- **Text Color:** click Color wheel icon on the right to change color of the text
- **Link Color:** click Color wheel icon on the right to change color of the link
- **Link Hover Color:** click Color wheel icon on the right to change color of the link when hovering
- **Button Background Color:** click Color wheel icon on the right to change color of the button background
- **Button Text Color:** click Color wheel icon on the right to change color of the button text
- **Button Hover Background Color:** click Color wheel icon on the right to change color of the button background when hovering
- **Button Hover Text Color:** click Color wheel icon on the right to change color of the button text when hovering

Thinnk theme

- **Product Labels:**

Button Hover Text Color [store view] #ffffff

Product Labels

Label "New" Background Color [store view] #cb005a

Label "New" Text Color [store view] #ffffff

Label "Sale" Background Color [store view] #00d369

Label "Sale" Text Color [store view] #ffffff

Font

Configurations are:

- **Label "New" Background Color:** click Color wheel icon on the right to change color of the label "New" background
- **Label "New" Text Color:** click Color wheel icon on the right to change color of the label "New" text
- **Label "Sale" Background Color:** click Color wheel icon on the right to change color of the label "Sale" background
- **Label "Sale" Text Color:** click Color wheel icon on the right to change color of the label "Sale" text

Note: after saving the configuration, we must run flush cache and deploy command for frontend to update the changes

Font

Label "Sale" Text Color [store view] #ffffff

Font

Basic Font Size [store view] 14 px

Size of the regular text. Font size of most of the other elements will be calculated relative to this value.

Heading Font Family [store view] Custom...

Select predefined font stack, Google Fonts or type in your custom font stack.

Font Family from google font [store view]

<link href="https://fonts.googleapis.com/css?family=Roboto:100,300,400,500,700" rel="stylesheet">

Type in your custom font from google font, e.g.:
<link href="https://fonts.googleapis.com/css?family=Roboto:100,300,400,700" rel="stylesheet" />
Important: only add google font.

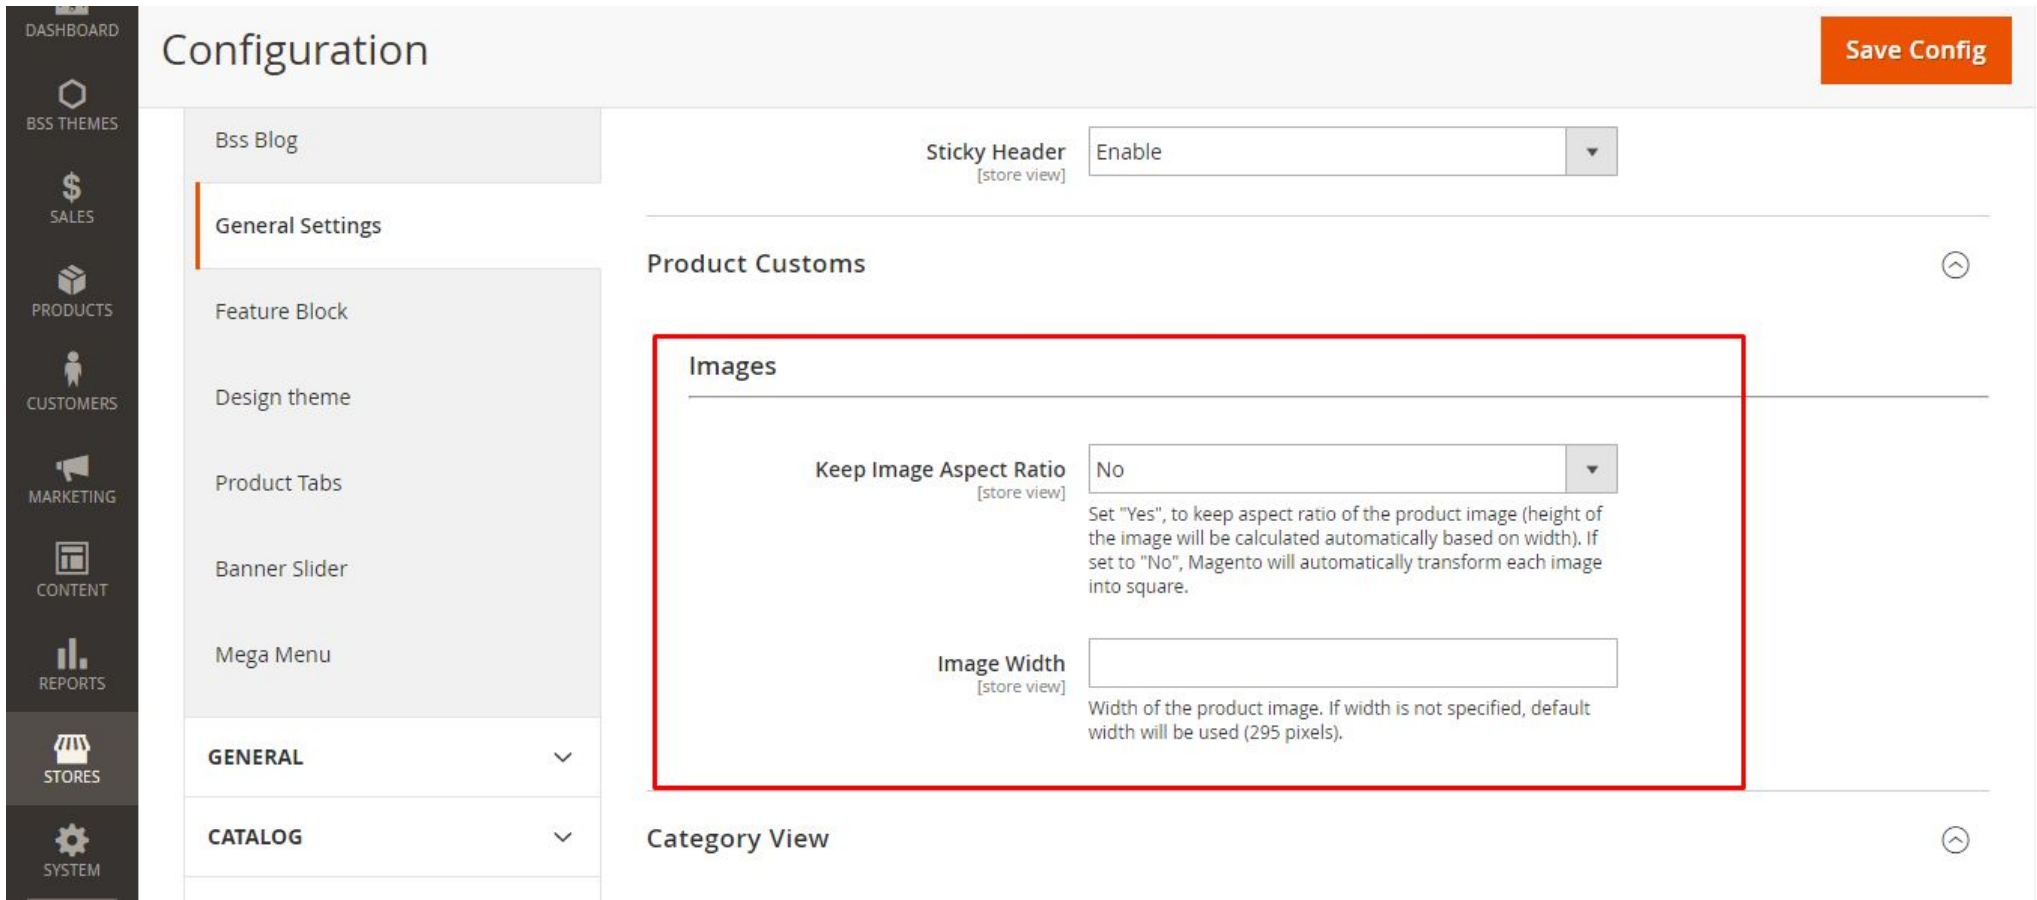

Font Family Custom Name [store view] Roboto

Font family name, e.g.: Roboto
Important: Do not add trailing semicolon.

Font Weight [store view] 300

Specify the weight of the font. You can only use **numeric font weights** which are available for the CSS property *font-weight*. E.g. normal weight is 400, bold is 700. Leave empty to use default weight.<

- **Basic Font Size:** click at the value in drop down list to choose basic font size. This is the size of regular text. Most of the other elements' font size will be calculated relative to this value.
- **Heading Font Family:** select predefined font stack in drop down list to choose heading font family.
- **Font Family from Google font:** type in your custom font from google font.
Note: Only add Google font.
- **Font Family Custom Name:** type in your font family custom.
Note: Do not add trailing semicolon.
- **Font Weight:** specify the weight of the font. You can only use numeric font weights which are available for the CSS property font-weight. E.g. normal weight is 400, bold is 700. Leave empty to use default weight.
Note: normal weight is 400, bold is 700. Leave empty to use default weight.

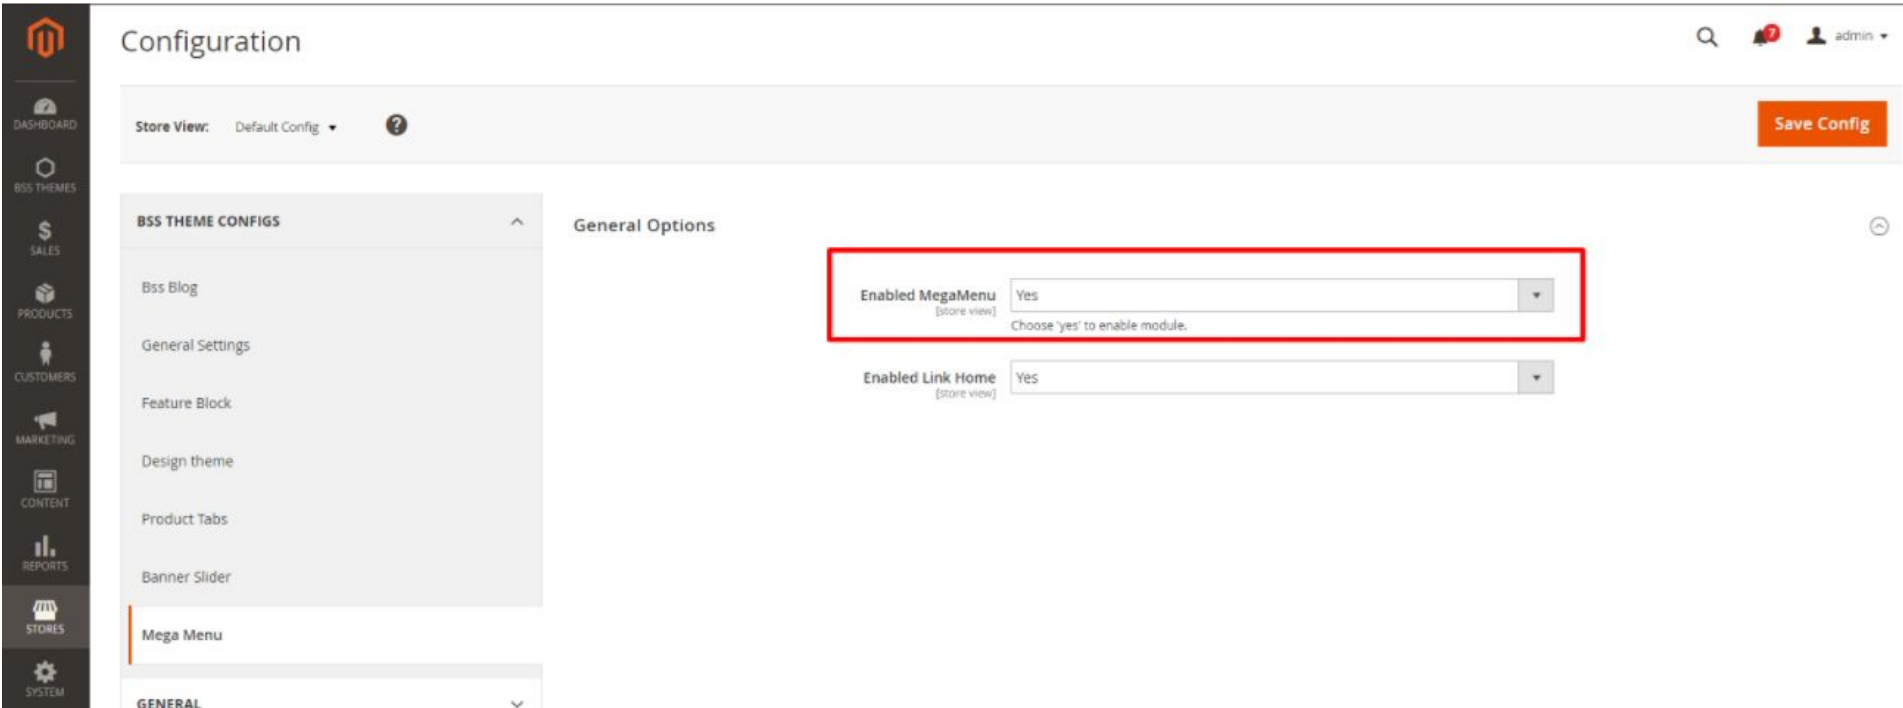

- **Keep Image Aspect Ratio:** Set **Yes**, to keep aspect ratio of the product image (height of the image will be calculated automatically based on width). If set to **No**, Magento will automatically transform each image into square.
- **Image Width:** Input the width value (pixel) of product image. If width is not specified, default width will be used as 295 pixels.

4.2.3. Enable Mega menu

Configurations can be changed in **BSS Themes > Mega Menu > Configurations**

For more configurations with Mega menu, see more at [5.1.2. Mega menu](#)

- **Enabled MegaMenu:** choose **Yes** to enable Mega menu, or **No** to disable it.
- **Enabled Link Home:** choose **Yes** to enable Home item in Mega menu, or **No** to disable it.

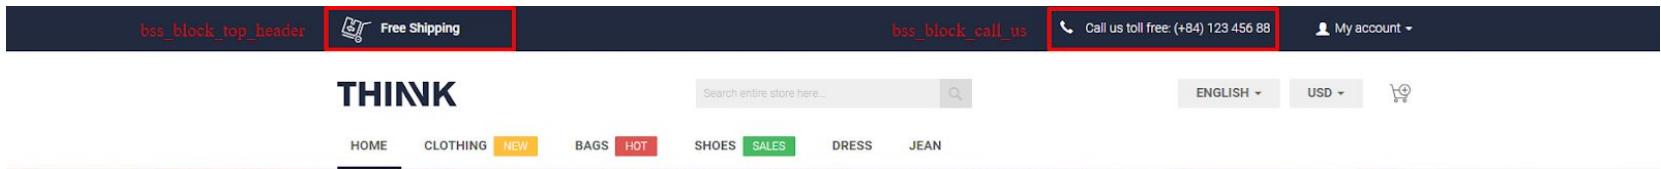

5. Theme elements (incl. Design + Configs)

5.1. Header

5.1.1. Header CMS blocks

Top Header

The following block identifiers can be used to display blocks in the top header section of the store:

Thinnk theme

- **bss_block_top_header**: shipping info at the top of the header, floating left.

Block name: **Bss Block Top Header**

Content:

```
<div class="col-xs-4 col-md-4 top-header-block row"><span class="shipping-icon"></span>

<p>Free Shipping</p>

</div>
```

- **bss_block_call_us**: help/contact info at the top of the header, floating right.

Block name: **Bss Block Call Us**

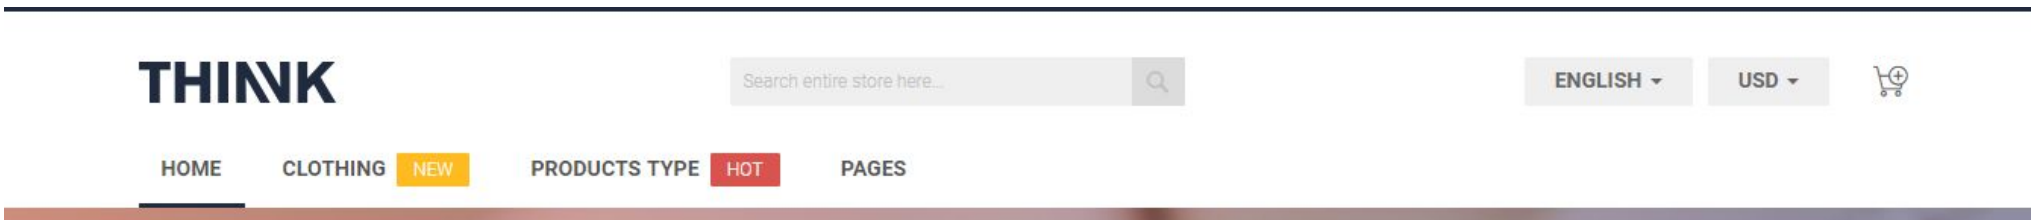

Content:

```
<div class="col-xs-6 col-md-6 call_us text-right row"><span class="glyphicon glyphicon-earphone"></span> <span
class="text">Call us toll free: (+84) 123 456 88</span></div>
```

To change the content of these blocks, go to their **Content input field** in **Content > Blocks, Choose block name > Select > Edit**.

Main header

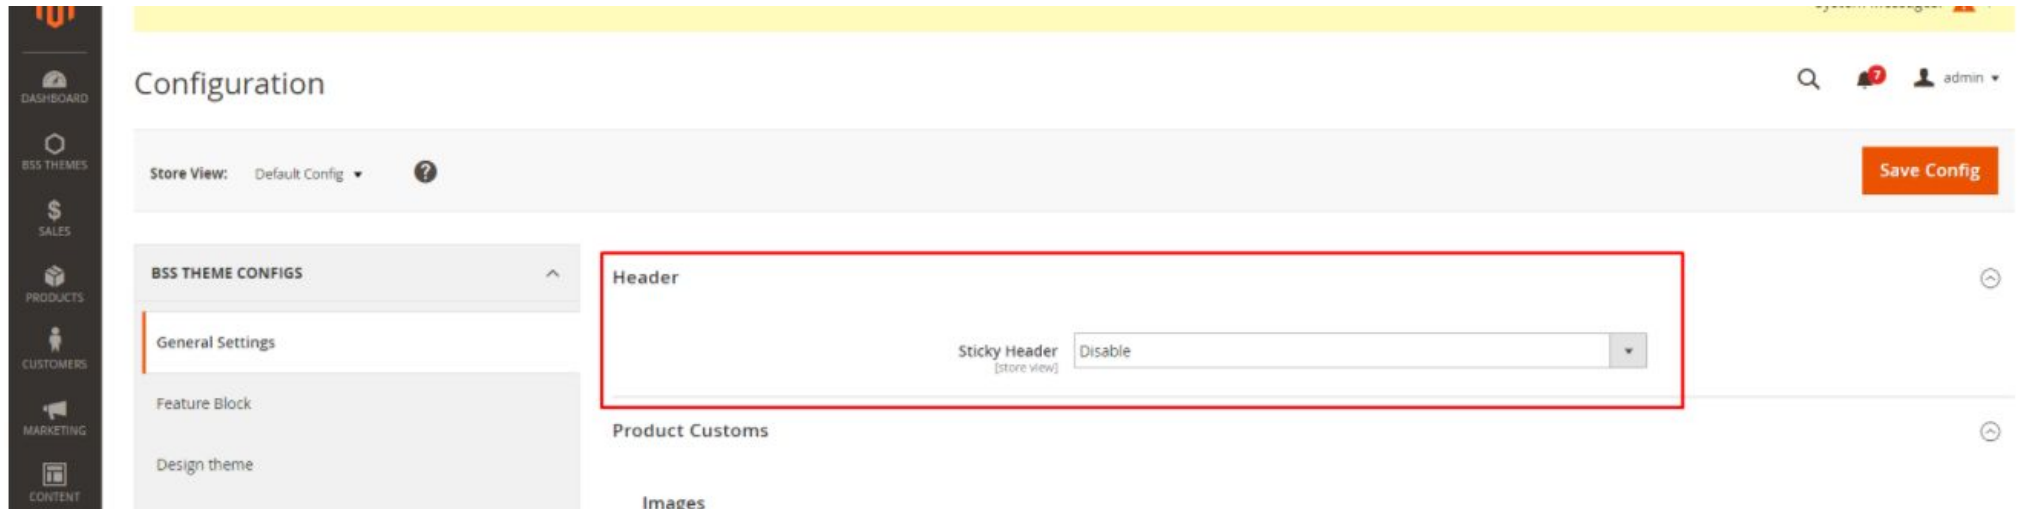

The main header section of the store includes these blocks:

1. Logo
2. Language
3. Currency
4. Shopping cart
5. Menu (Mega menu)

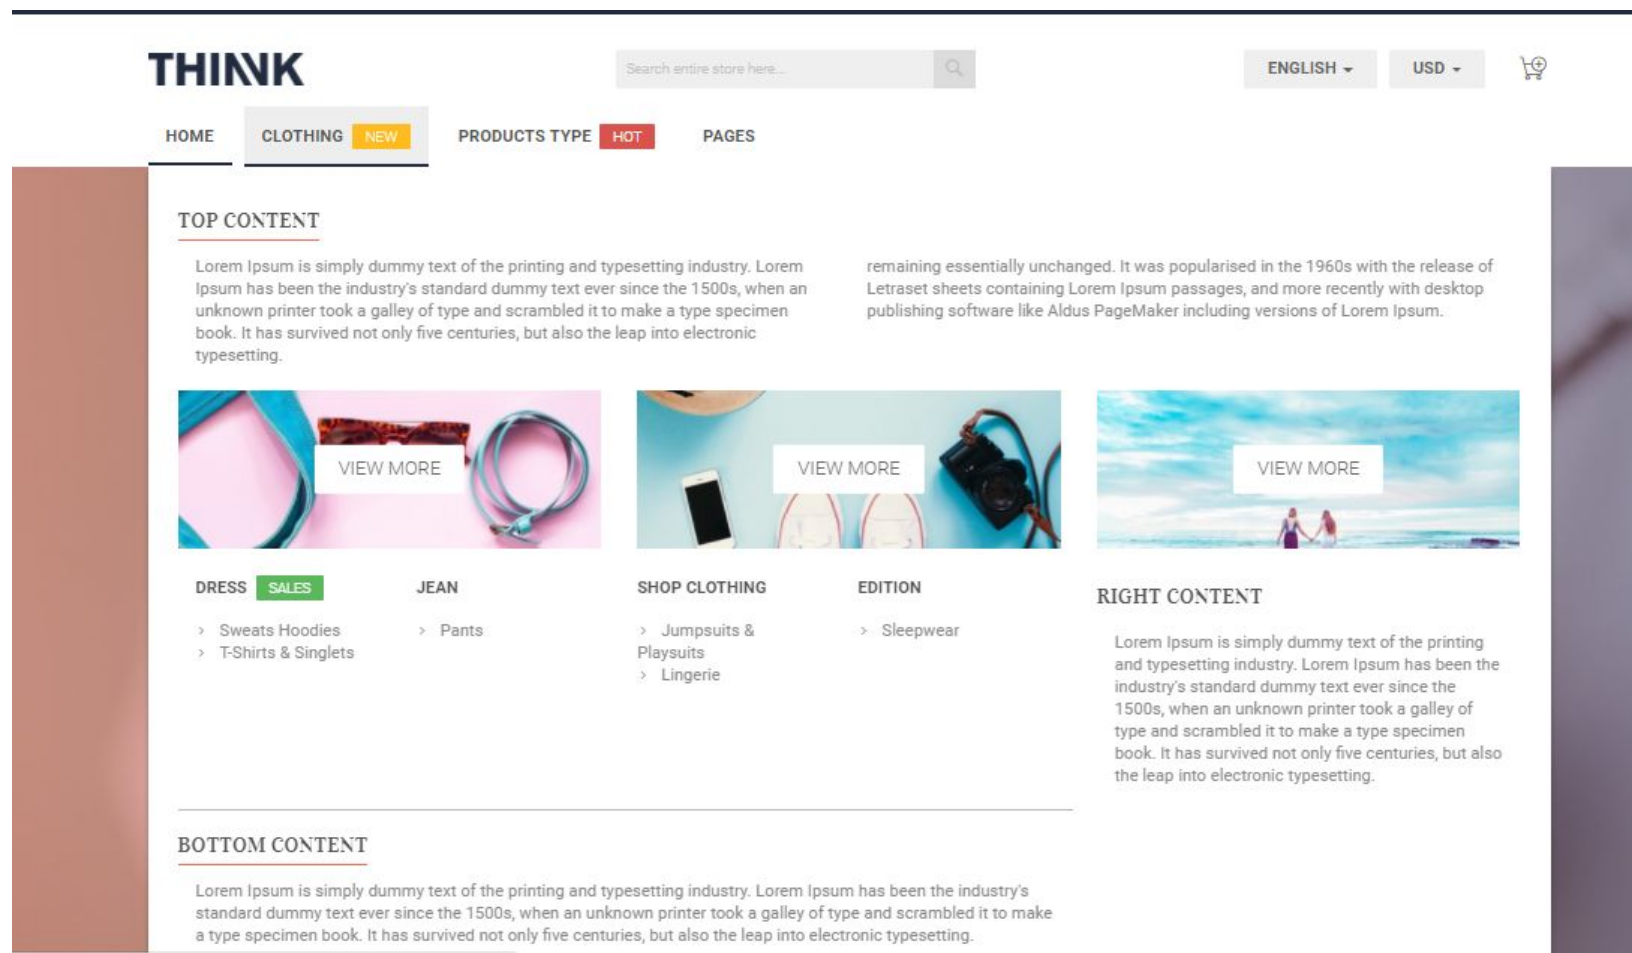

Sticky header configuration:

Configuration can be changed in **Stores > Configuration > BSS Theme Configs > General Settings > Header**

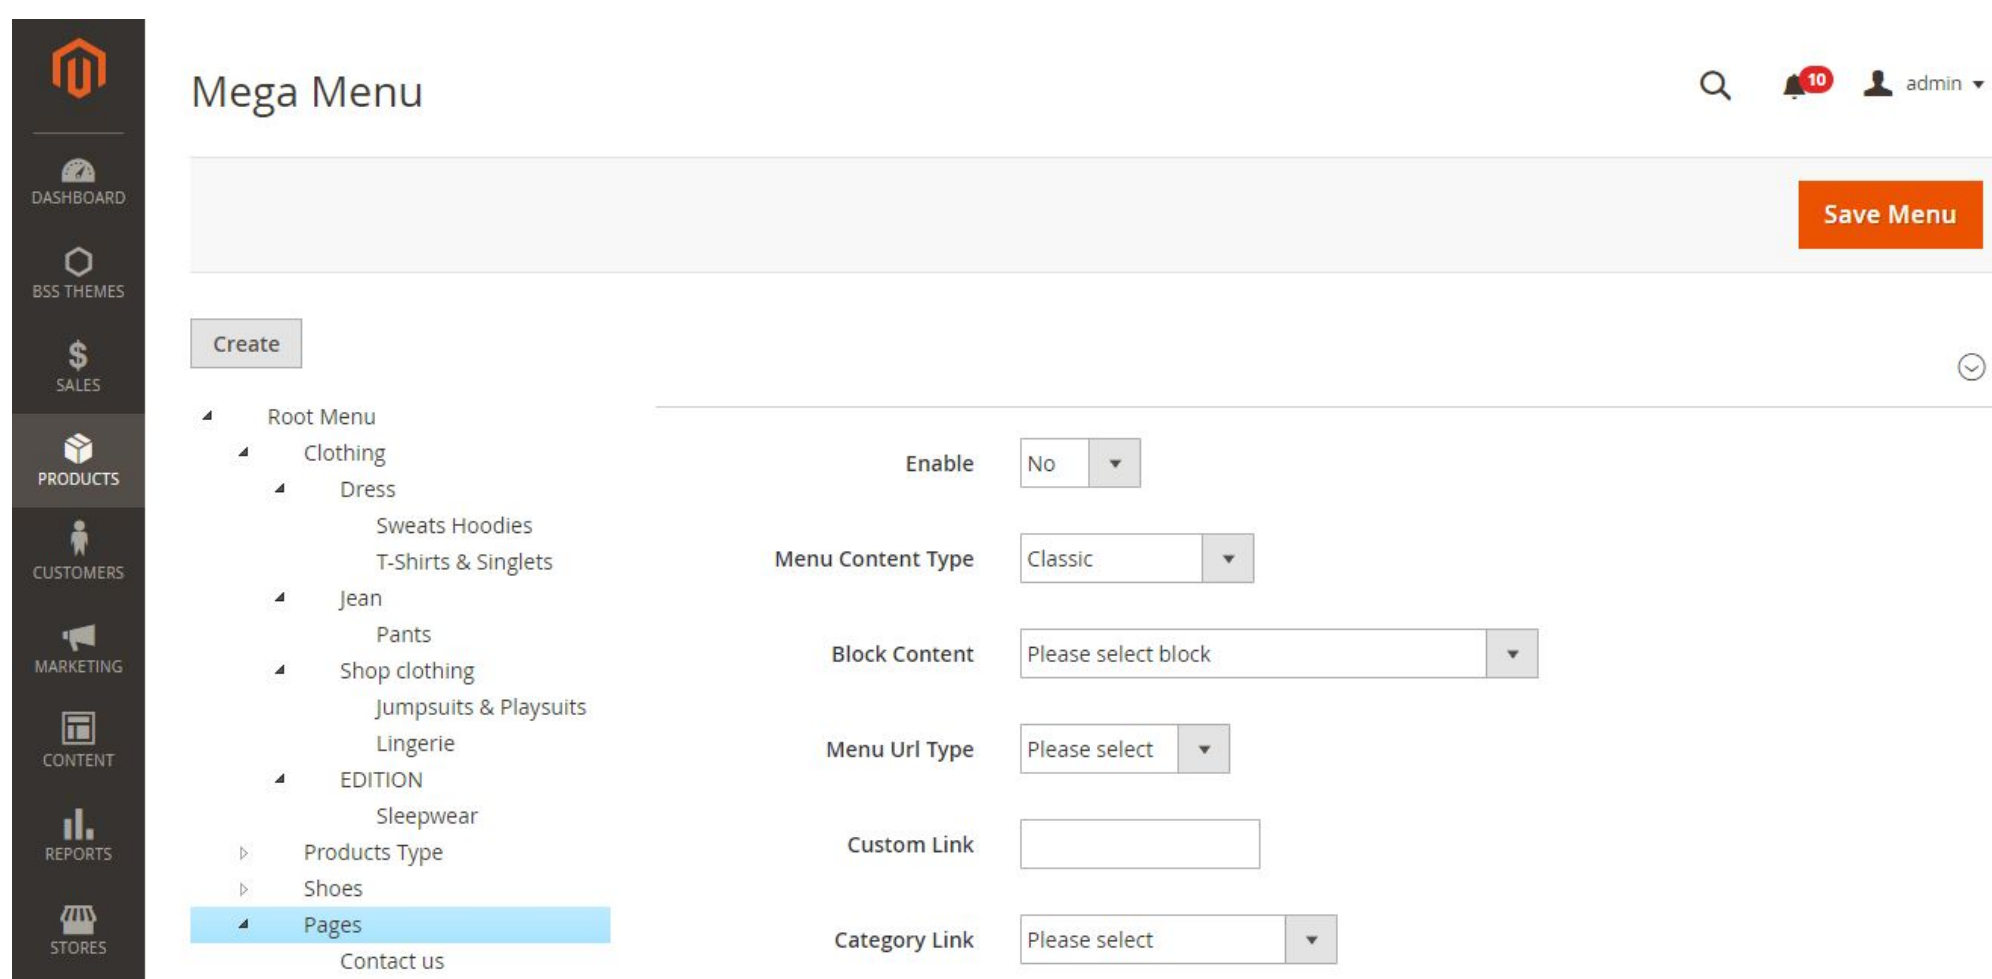

- **Sticky Header**: choose **Enable** to enable Sticky header, or **Disable** to disable it.

5.1.2. Mega menu

Configuration

To choose Mega menu items, go to **BSS Themes > Mega Menu > Manage Menu Items**

With each of the category and sub-category on the left, there are config for Mega menu as follows:

- **Enable:** choose **Yes** to display that category/sub-category in Mega menu, or **No** to hide it.
- **Menu Content Type:** choose the content type of the menu among **Classic**, **Category Listing** and **Content**
- **Block Content:** choose CMS block to display on the Mega menu (these blocks are also listed in Magento CMS blocks)
- **Menu Url Type:** choose between **Category Link** and **Custom Link**
 - **Custom Link:** If Custom Link is chosen in Menu Url Type field, then fill in the link in the text box.
 - **Category Link:** If Category Link is chosen in Menu Url Type field, then select the Category
- **Menu Width Type:** choose between **Full Width** and **Classic**
- **Label Type:** choose which Label type to display on Mega menu among **New**, **Hot**, **Sale**
- **Static Block Top:** choose which Static block to display on the top of the Mega menu
- **Static Block Right:** choose which Static block to display on the right of the Mega menu
- **Static Block Bottom:** choose which Static block to display at the bottom of the Mega menu
- **Static Block Left:** choose which Static block to display on the left of the Mega menu

5.2. Footer

The following block identifiers can be used to display blocks in the top header section of the store:

- **bss_logo_footer_block:** company logo

Block name: **Bss Logo Footer Block**

Content:

```
<div class="col-xs-12 col-sm-4 col-md-12 footer-logo"><a href="{{store url='/'}}"></a></div>
```

- **bss_footer_store_info:** info about company, phone number, address etc.

Block name: **Bss Footer Store Info**

Content:

```
<div>

<ul class="list-unstyled address-list margin-bottom-20 icons">

<li class="col-xs-12 col-sm-4 col-md-12"><i class="glyphicon glyphicon-map-marker"></i><address><strong>Address:</strong>109 Sky Tower, Street name, AZ District, New York City, USA</address></li>

<li class="col-xs-12 col-sm-4 col-md-12"><i class="glyphicon glyphicon-envelope"></i><address><strong>Email:</strong>info@anybiz.co</address></li>

<li class="col-xs-12 col-sm-4 col-md-12"><i class="glyphicon glyphicon-phone-alt"></i><address><strong>Phone:</strong>800 123 3456</address></li>

</ul>

</div>
```

- **bss_footer_links_our_company:** info about your company

Block name: **Bss Footer Links Our Company**

Content:

```
<h3 class="thumb-headline">Our Company</h3>

<ul class="list-unstyled simple-list links">

<li><a href="{{store url='about-us'}}">About Us</a></li>

<li><a href="{{store url='blog'}}">Blog</a></li>

</ul>
```

- **bss_footer_terms_privacy:** info about terms and privacy

Block name: **Bss Footer Terms and Privacy**

Content:

```
<h3 class="thumb-headline">Terms and Privacy</h3>

<ul class="list-unstyled simple-list links">

<li><a href="privacy-policy-cookie-restriction-mode/">Privacy and Cookie Policy</a></li>

<li><a href="search/term/popular/">Search Terms</a></li>
```

Thinnk theme

```
<li><a href="sales/guest/form/">Orders and Returns</a></li>

</ul>
```

- **bss_footer_support_links:** info about customer support

Block name: **Bss Footer Support Links**

Content:

```
<h3 class="thumb-headline">Support</h3>

<ul class="list-unstyled simple-list links">

<li><a href="contact/">Contact Us</a></li>

<li><a href="catalogsearch/advanced/" data-action="advanced-search">Advanced Search</a></li>

</ul>

• bss_social_icons_block: social services links.
```

Block name: **Bss Social Icons Block**

Content:

```
<div class="social-icons-block">

<ul class="list-inline shop-social">

<li><a href="#"><i class="bt-icon-social-facebook"></i>facebook</a></li>

<li><a href="#"><i class="bt-icon-social-linkin"></i>linkin</a></li>

<li><a href="#"><i class="bt-icon-social-pinterest"></i>pinterest</a></li>

<li><a href="#"><i class="bt-icon-social-youtube"></i>youtube</a></li>

<li><a href="#"><i class="bt-icon-social-twiter"></i>twitter</a></li>

</ul>

</div>
```

- **bss_block_bottom_footer:** info about payments method

Block Name: **Bss Block Bottom Footer**

Content:

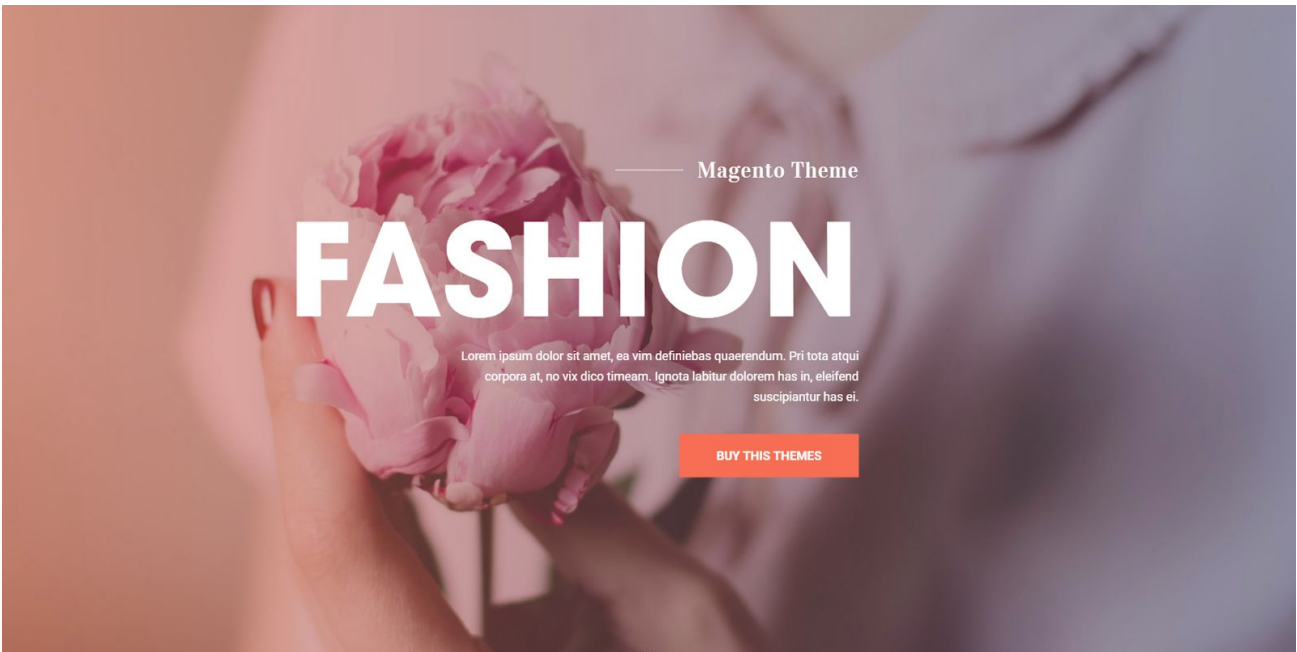

```
<div class="icon-payment-method"></div>
```

To change the content of these blocks, go to their Content input fields in **Content > Blocks, Choose block name > Select > Edit**.

5.3. Homepage

5.3.1. Homepage banner slider

This element display on homepage with the position as below:

Thinnk theme

Configurations can be changed in

1. Stores > Configuration > BSS Theme Configs > Banner Slider > General Options

Store View: Default Config ?

BSS THEME CONFIGS

```

Note: text in red are the titles on frontend

5.3.7. Brand block

This section is a CMS block that shows the brands that you work with. It will be added to your store if you choose to import our sample data (see more at [3.2.4. Import Sample Data](#))

Identifier: **bss_brands**

Block name: **Bss Brands**

Content:

```
<div class="item brand-item"><a href="#"></a></div>

<div class="item brand-item"><a href="#"></a></div>

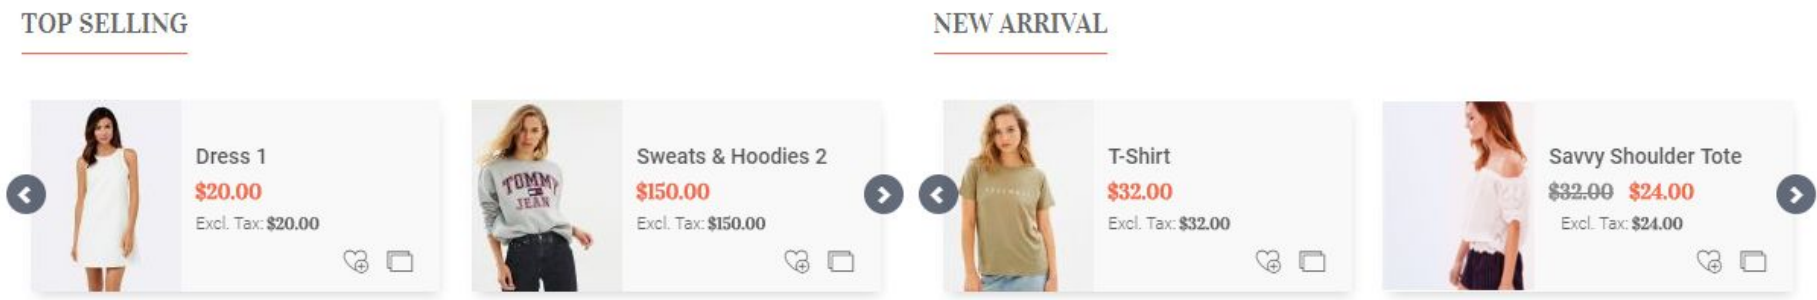

<div class="item brand-item"><a href="#"></a></div>

<div class="item brand-item"><a href="#"></a></div>

<div class="item brand-item"><a href="#"></a></div>

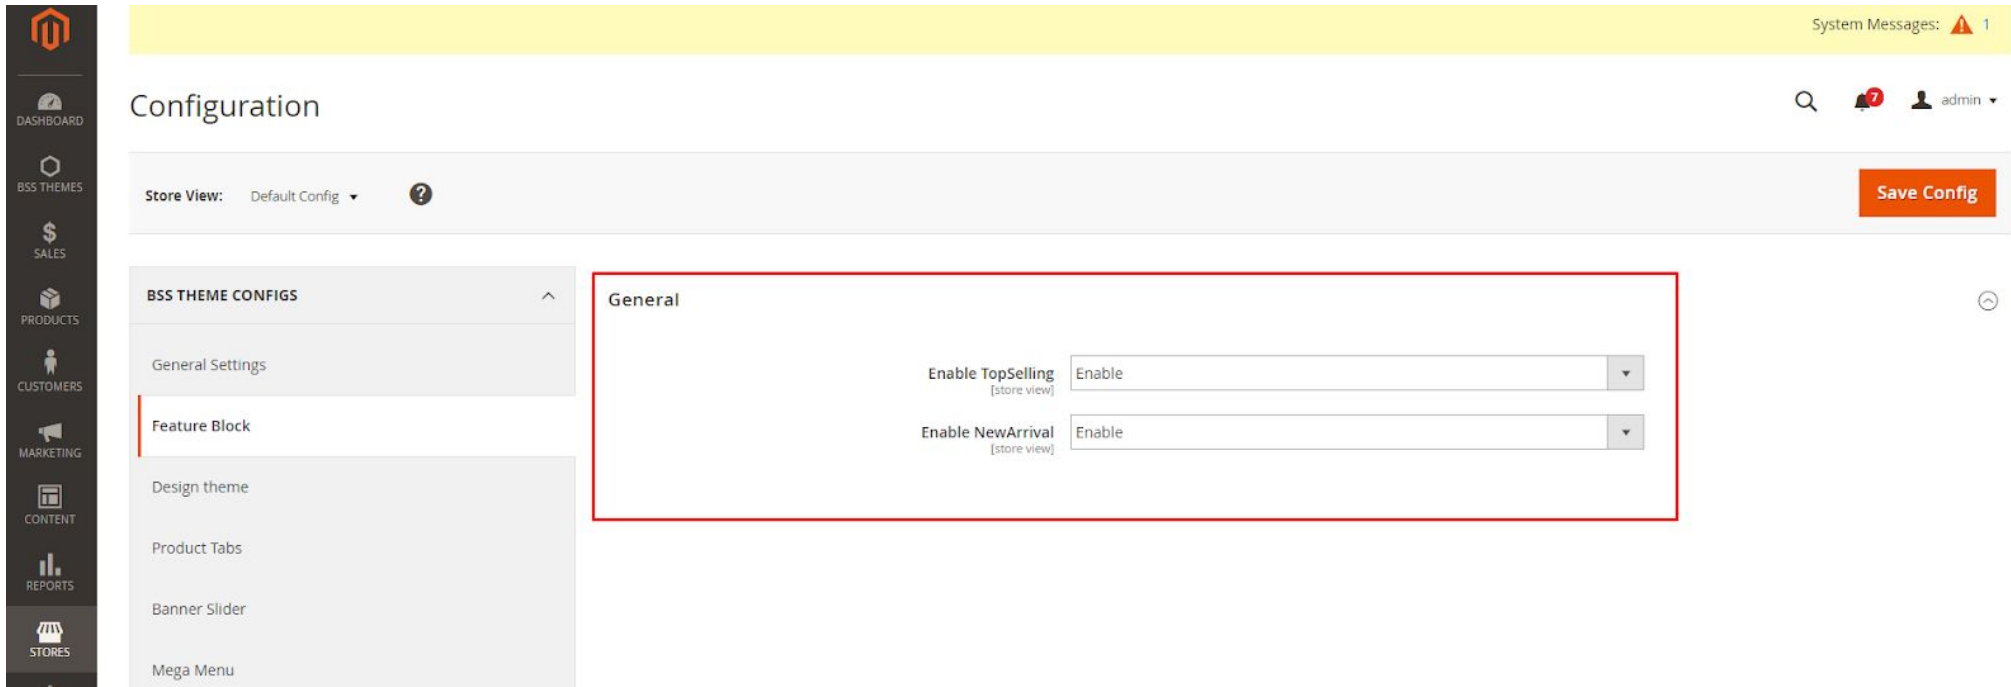

<div class="item brand-item"><a href="#"></a></div>
```

5.3.8. Top selling and New Arrival

This section will show your best selling (in latest month) and newly added products

This block configurations can be changed in **Stores > Settings > Configuration > BSS Theme Configs > Feature Block > General**

- **Enable TopSelling:** choose **Enable** to enable Top Selling block, or **Disable** to disable it.

Thinnk theme

- **Enable NewArrival:** choose **Enable** to enable New Arrival block, or **Disable** to disable it.

New arrival section only shows product which is set the date in **Products > Catalog > choose product > Set product as new from...**

Stock Status [global] In Stock ▼

Weight [global] lbs This item has weight ▼

Tag [store view]

Categories [global] Select... ▼ **New Category**

Visibility [store view] Catalog, Search ▼

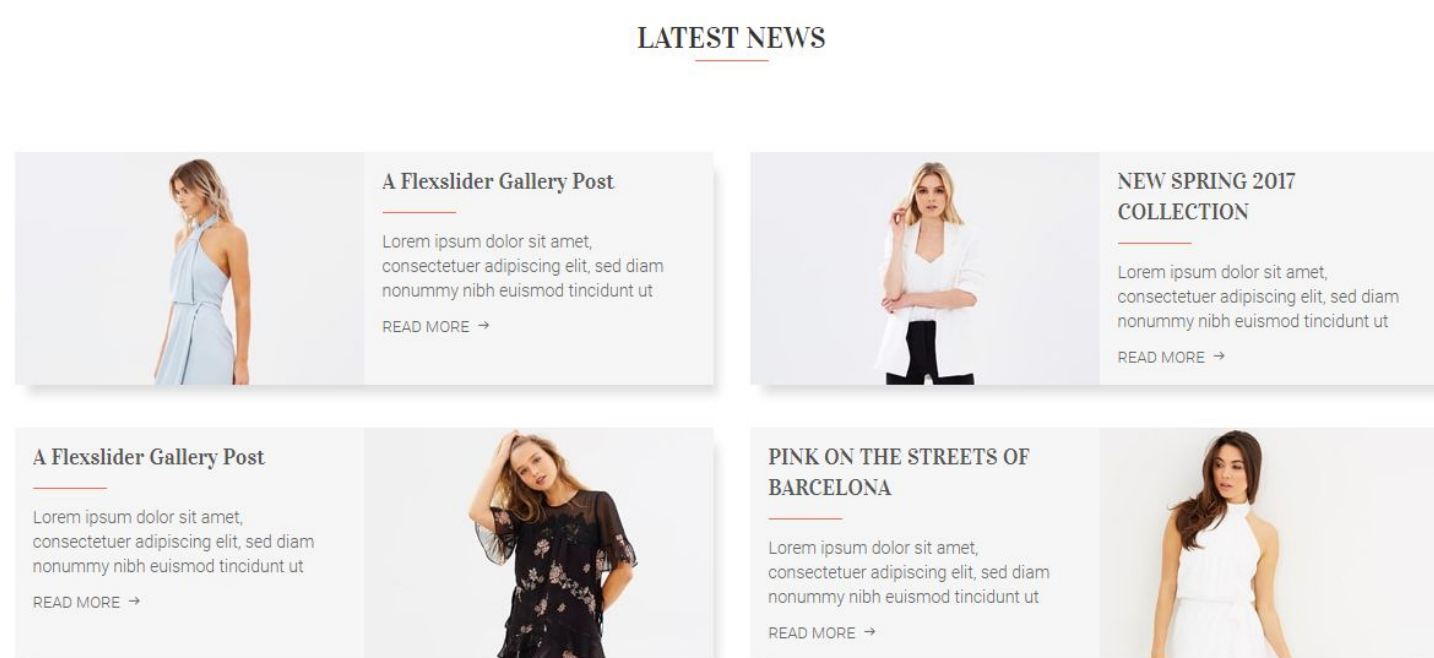

Set Product as New From [website] 01/17/2018 To 03/28/2018

Country of Manufacture [website]

Is Hot deal product? [global] Yes ▼

Color [global]

5.3.8. Latest news

This section will show your 4 latest blog posts (see more about blog features in [6.6. Blog page](#))

Block name: **Lastest News Block**

Identifier: **latest_news**

Then go to **CONTENT > Pages > Select "Home page"** to add this block to homepage

Content:

```
<referenceBlock name="breadcrumbs" remove="true" />

<referenceContainer name="main.content">

<container name="bss.lastest.news.container" as="bss_lastest_news_container" label="Bss Lastest Block"
htmlTag="section" htmlClass="lastest-news-block clearfix" after="-" >

    <block class="Bss\Blog\Block\Post\Latest" name="latest_news" template="post/latest_news.phtml"
/>

</container>

</referenceContainer>
```

5.4. Category page

5.4.1. Category page layout

In Magento you can select category page layout - the number of columns: one, two, or three columns. To do this, go to **Products > Categories**, select the category > choose **Design** field, select layout type in the drop down list in **Layout (1 column, 2 columns with left bar, 2 columns with right bar and 3 columns)** and click **Save Page** button

5.4.2. Category view

In this tab, you can set options related to the category view. Category view presents the list of products from the selected category.

Configurations can be changed in **Stores > Configuration > BSS Theme Configs > General Settings**

Category View > Product configs

- **Product Hover Effect:** allows product information (name, price...) to show only when customers hover on product image, choose **Enable** to enable the effect, or **Disable** to disable it.
- **Disable Hover Effect in mobile:** choose **Enable** to enable the effect in mobile, or **Disable** to disable it.
Note: Product Hover Effect will be disabled if width of the browser viewport is below 768px.
- **Align Center:** Align center elements of the grid item: product name, price, button etc., choose **Yes** to enable alignment, or **No** to disable it.
- **Display Name in Single Line:** choose **Yes** to display in single line, or **No** to disable it.
Note: When setting **Yes**: if product name is too long to be displayed in a single line, it will be clipped and an ellipsis ('...')
- **Price:** choose among **Hide**, **Show** and **Show On Hover**

Thinnk theme

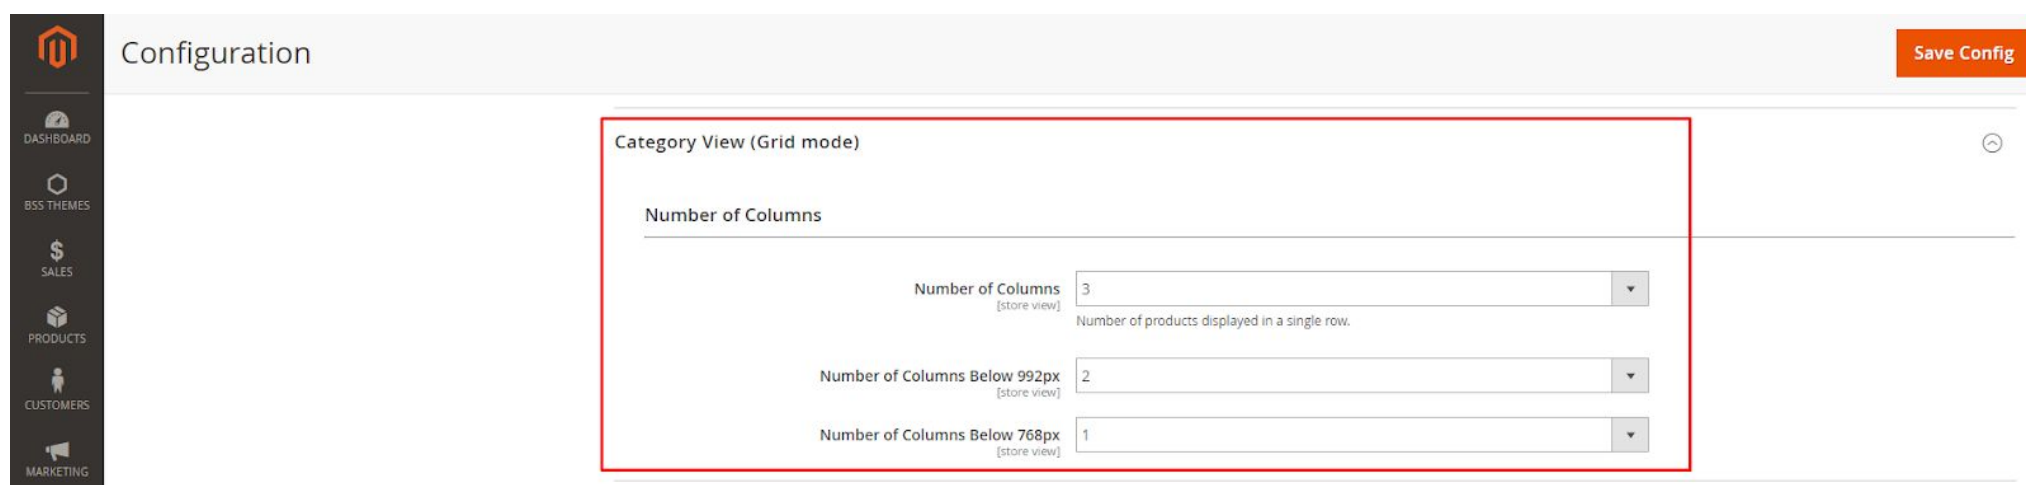

- **Ratings:** choose among **Hide**, **Show** and **Show On Hover**

5.4.2.1. Category grid view

In this tab, you can set options related to the grid mode of the category view.

On Frontend, to display category in grid view, click **Grid view icon**  on the right of the screen.

Configs can be changed in **Stores > Configuration > BSS Theme Configs > General Settings > Category View (Grid mode) > Number of Columns**

The screenshot shows the 'Configuration' page with a sidebar on the left containing icons for Dashboard, BSS Themes, Sales, Products, Customers, and Marketing. The main content area is titled 'Configuration' and has a 'Save Config' button in the top right. A red box highlights the 'Category View (Grid mode)' section, which contains the following settings:

- Number of Columns** (store view): 3 (Number of products displayed in a single row.)
- Number of Columns Below 992px** (store view): 2
- Number of Columns Below 768px** (store view): 1

- **Number of Columns:** number of products displayed in a single row
- **Number of Columns Below 992px:** number of products displayed in a single row with 992px screen width (tablet view)
- **Number of Columns Below 768px:** number of products displayed in a single row with 768px screen width (mobile view)

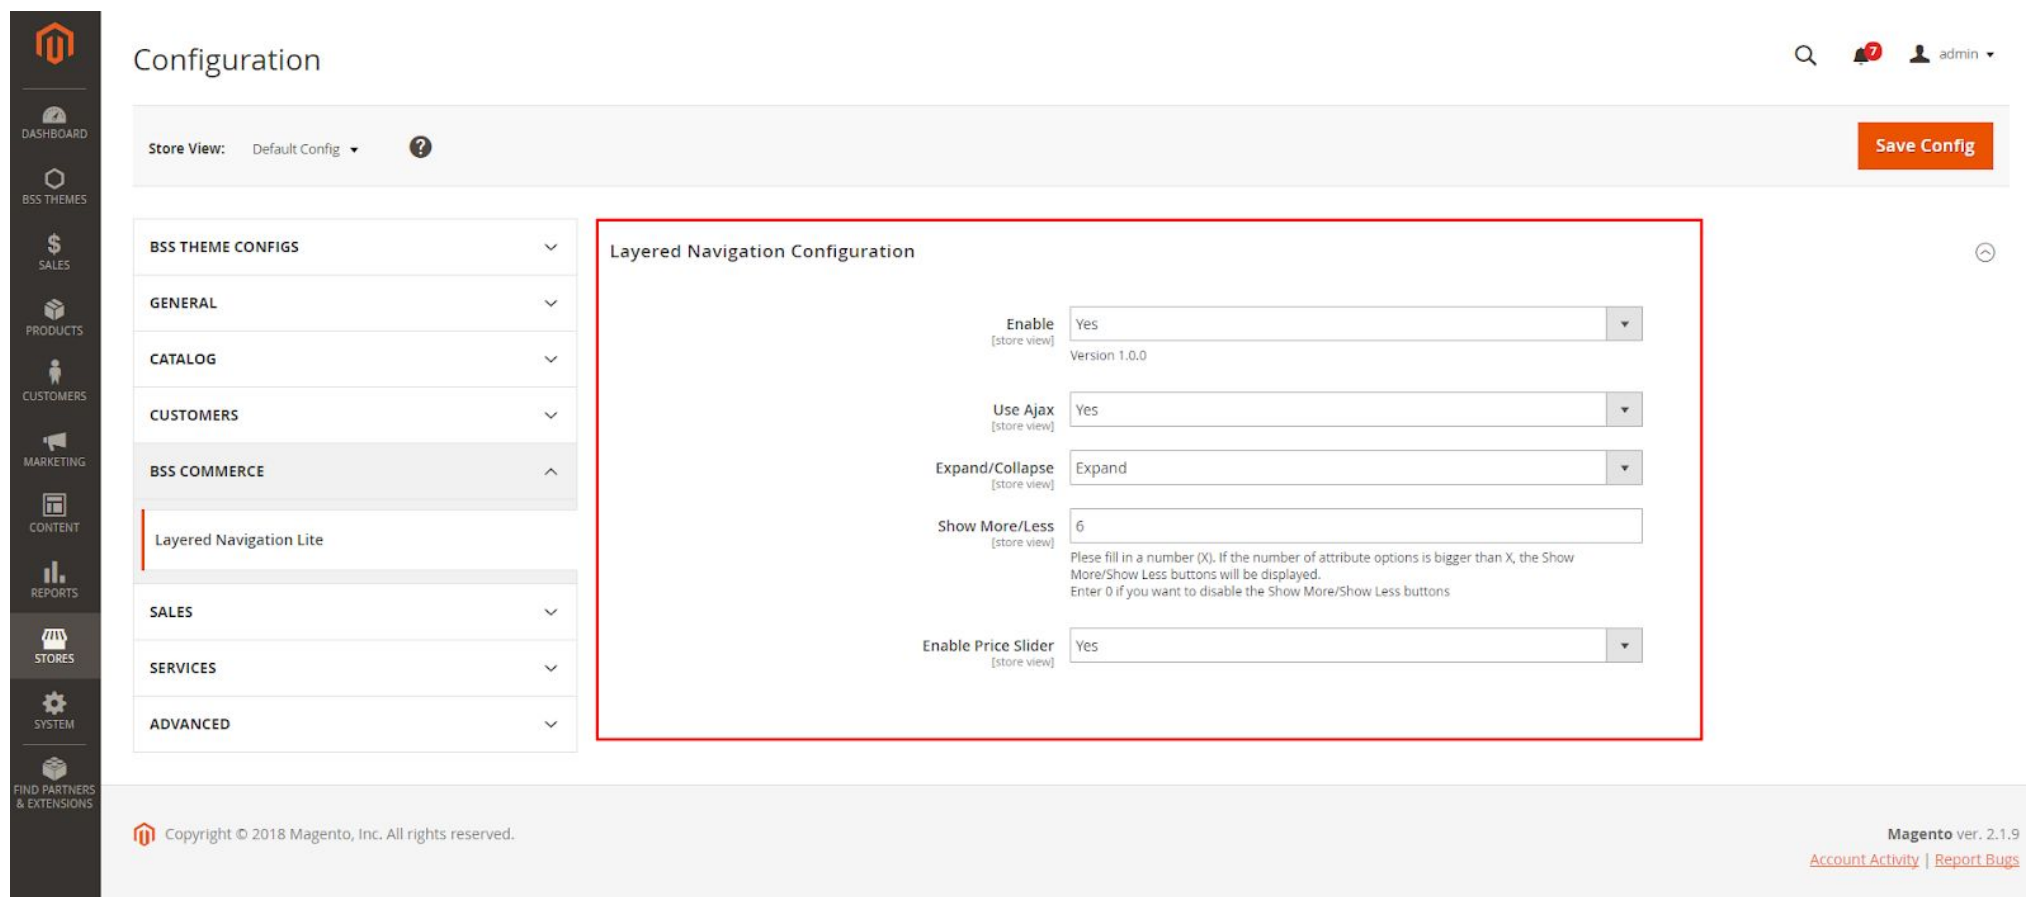

5.4.2.2. Category list view

On Frontend, to display category in grid view, click **List view icon**  on the right of the screen.

5.4.3. Layered navigation

Layered navigation is a feature function in Thinnk theme. It helps customers to find products based on category, price range, or any other available attributes and plays a role as a filter. **Layered navigation** usually appears in the left column of search results and category pages and sometimes on the home page.

Configs can be changed in **Stores > Configuration > BSS Commerce > Layered Navigation Lite > Layered Navigation Configuration**

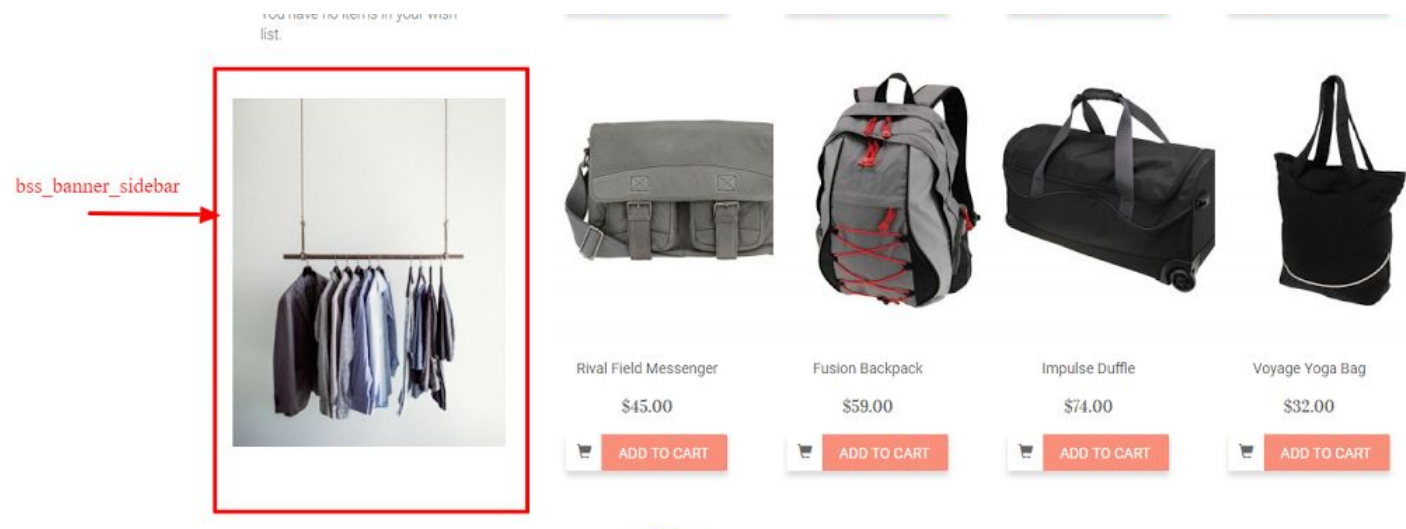

The screenshot shows the 'Configuration' page with a sidebar on the left containing icons for Dashboard, BSS Themes, Sales, Products, Customers, and Marketing. The main content area is titled 'Configuration' and has a 'Save Config' button in the top right. A red box highlights the 'Layered Navigation Configuration' section, which contains the following settings:

- Enable** (store view): Yes (Version 1.0.0)
- Use Ajax** (store view): Yes
- Expand/Collapse** (store view): Expand
- Show More/Less** (store view): 6 (Please fill in a number (X). If the number of attribute options is bigger than X, the Show More/Show Less buttons will be displayed. Enter 0 if you want to disable the Show More/Show Less buttons)
- Enable Price Slider** (store view): Yes

- **Enable:** choose **Yes** to enable Layered Navigation, or **No** to disable it.
- **Use Ajax:** choose **Yes** to enable Ajax, or **No** to disable it.
- **Expand/Collapse:** If choosing **Expand**, all attribute blocks in the Layered Navigation will be expanded, or collapsed if setting to **Collapse**.
- **Show More/Less:** Please fill in a number (X) in the field. If the number of attribute options is bigger than X, the Show More/Show Less buttons will be displayed. Enter 0 if you want to disable the Show More/Show Less buttons
- **Enable Price Slider:** choose **Yes** to enable Price slider, or **No** to disable it.

5.4.4. Category page CMS blocks

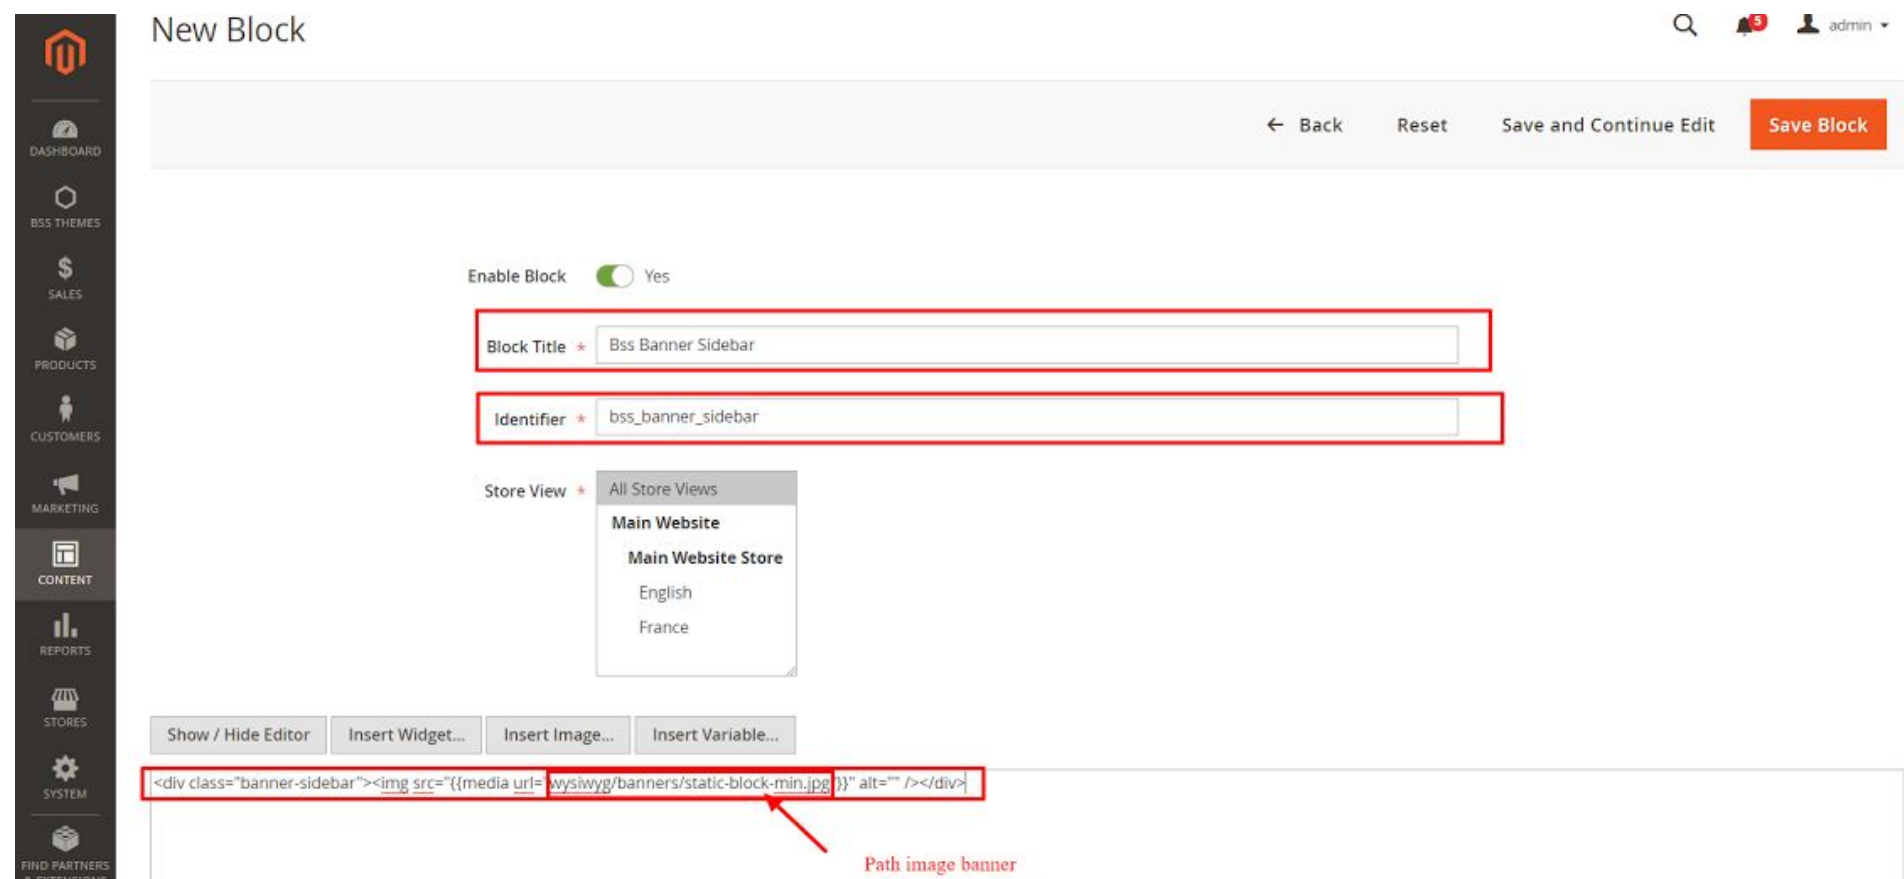

This block will be added to your store if you choose to import our sample data (see more at [3.2.4. Import Sample Data](#))

Block ID: **bss_banner_sidebar**

Block name: **Bss Banner Sidebar**

Configurations can be configured in **Content > Blocks > Choose bss_banner_sidebar > Select > Edit**

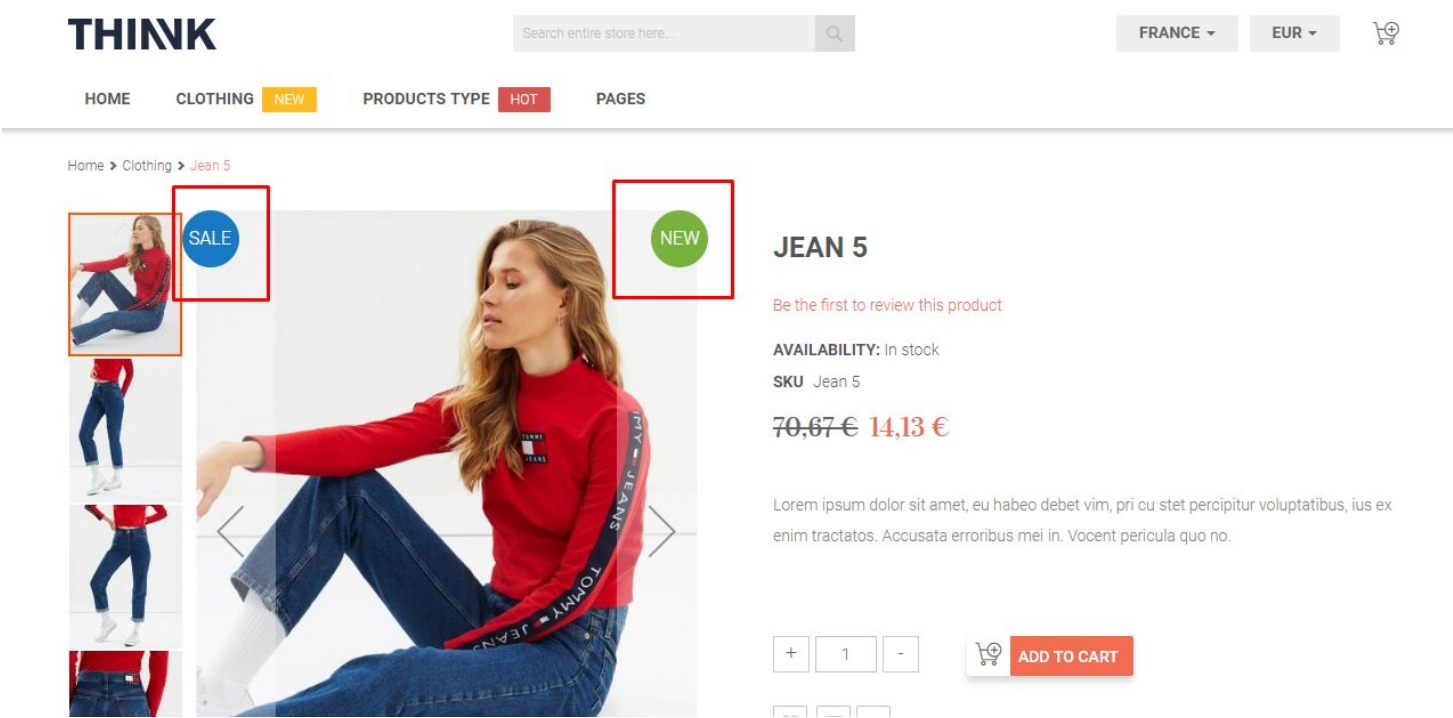

Content:

```
<div class="banner-sidebar"></div>
```

5.5. Product page

5.5.1. Product labels

Product label in product page will display as below:

Configs can be configured in **Stores > Configuration > BSS Theme Configs > General Settings > Product Labels**

- **Base URL:** input base url of blog collection page
- **Blog Name:** input name of your blog collection
- **URL Suffix for Posts:** input suffix in url for posts (the end of permalink for posts)
- **URL Suffix for Categories:** input suffix in url for categories (the end of permalink for categories)

5.6.2. Blog category

You can create and manage blog categories in **BSS Themes > Bss Blog > Category**

Blog Category Manager

Add New

Filters | Default View | Columns

Actions 5 records found | 20 per page | 1 of 1

ID	Title	URL Key	Sort Order	Store View	Status	Action
1	Celebrity & Gossip	celebrity-gossip	0		Enable	Edit
2	Fashion & Trends	fashion-trends	0		Enable	Edit
3	Makeup & Cosmetics	makeup-cosmetics	0		Enable	Edit
4	Inspiration	inspiration	0		Enable	Edit
5	Interior Design	interior-design	0		Enable	Edit

To edit a category, please **choose Category > Action > Edit > General**

The screenshot shows the BSS Themes admin interface. On the left is a dark sidebar with icons for Dashboard, BSS Themes, Sales, Products, Customers, Marketing, Content, Reports, Stores, System, and Find Partners & Extensions. The main header area displays '#Celebrity & Gossip' with a search icon and a notification bell. Below the header is a navigation bar with buttons: Back, Delete, Reset, Save and Continue Edit, and a Save button. The left sidebar of the main content area shows 'CATEGORY INFORMATION' with 'General' selected. The main content area is titled 'General Information' and contains the following fields:

- Status:** A dropdown menu set to 'Enable'.
- Title:** A text input field containing 'Celebrity & Gossip'.
- url key:** A text input field containing 'celebrity-gossip'.
- Store View:** A dropdown menu showing 'All Store Views', 'Main Website', 'Main Website Store', 'France', and 'English'.
- Image:** A section with a 'Choose File' button, 'No file chosen' text, and 'Allow image type: jpg, jpeg, gif, png'.
- Meta title:** An empty text input field.
- meta_keywords:** An empty text input field.
- meta_description:** An empty text input field.

5.6.3. Blog post page

You can create and manage blog posts in **BSS Themes > Bss Blog > Posts**

To manage content in **Post: Post > Post Manager, choose Post title > Action > Edit > General**

The screenshot shows the BSS Themes admin interface for a post. The sidebar and header are identical to the previous screenshot. The main header area displays '#A Flexslider Gallery Post'. The left sidebar of the main content area shows 'POST INFORMATION' with 'General' selected. The main content area is titled 'General Information' and contains the following fields:

- Status:** A dropdown menu set to 'Enable'.
- Title:** A text input field containing 'A Flexslider Gallery Post'.
- Select Category:** A dropdown menu showing 'Celebrity & Gossip', 'Fashion & Trends', 'Makeup & Cosmetics', 'Inspiration', and 'Interior Design'.
- Store View:** A dropdown menu showing 'All Store Views', 'Main Website', 'Main Website Store', 'France', and 'English'.

6.2. Support

6.2.1. Policy

We only provide support for issues related strictly to the theme. We do not provide support for Magento configuration, installation, maintenance etc. If you have questions about Magento (for example: about managing categories and products, creating attributes, installing extensions etc.), please refer to ***Magento Forum***. Almost every detail of Magento configuration is described there so you will find answers for all your questions. You will also find many helpful tutorials.

The best place to start searching is the ***online Magento guide***. You can find there all the basic configuration information.

If you find any bugs (so far there were only a few, all fixed immediately), please contact us through the contact form on ***our profile page*** on <http://bssthemes.com/>.

6.2.2. Contact us

Any questions or concern about us, feel free to contact:

- Website: <http://bssthemes.com/>
- Support: support@bssthemes.com

BSS Theme Support team is always ready to aid you with any issue referring to our products. Additionally, we also give you Website development and Administration Support
